

DRAPERY

Plug-in Motor

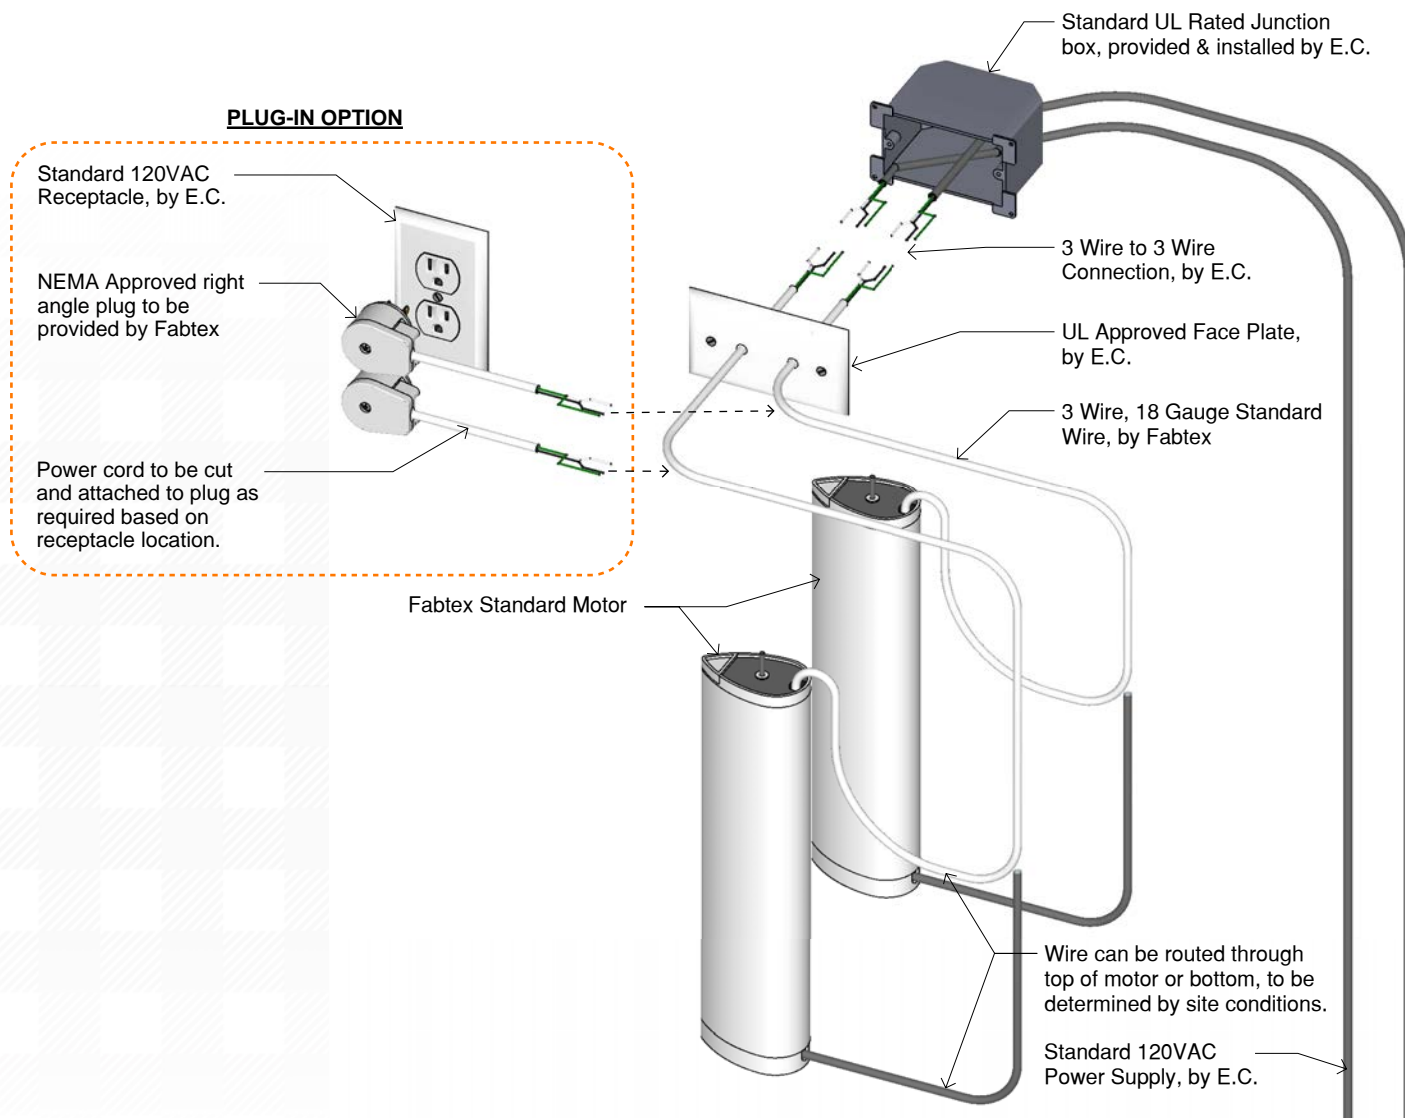

The drapery AC motor provides 1Nm of power in a compact, cost-effective package. Drawing power from 120VAC, it can be controlled via RF wireless or dry contact (hardwire requires licensed electrician to terminate the connection).

Motorized Drapery Track with Dry Contact Control

Included 12 foot power cord can be configured on-site to run off the bottom, side, or top of the motor. Low voltage line attaches to RJ-9 on the bottom of the motor, Port 1. Available with wall or ceiling mount bracketry.

Specifications: 120VAC, 60Hz, 55W, 0.46A

The motor produces less than 40bDA and operates on motorized track. Designed as a plug-in device for ease of installation, the plug can be discarded for hardwired installations. The included 12-foot power cord can be configured on-site to run on the bottom, side, or top of the motor. Available with wall or ceiling mount bracketry.
