

Plug-In Single Roller Shade

Scale: NTS

RJ-12 Connector Dtl.

Scale: NTS

ML-350F Motor
120VAC @ 60Hz
6Nm Torque
33 RPM
0.85 Amps
102 Watts
Max. Whip Length:
8 Meters (312")
4 Meters (156")
2 Meters (78")

General Installation Notes:

- 1) The ML-350F Tubular Motor provides 6Nm of power in a compact, cost effective package. Drawing power from 120VAC, the 350F accommodates two different methods of control; RF wireless and dry contact. This means the ability to use wireless wall mounted and hand-held remote options but also built-in wired Dry Contact relays which allow for 3rd party integration.
- 2) The ML-350F produces less than 40bDA and powers shades on a 2" and 2.5" tubes. Designed to be used as a plug-in device for ease of installation, the plug can be omitted for hardwired installations. Each motor comes standard cord and an adjustable right angle plug. The purpose is to allow installation crews to cut the cord to length and attach the plug end. When direct wiring is required, a local licensed electrician will be needed to terminate the connection.
- 3) Built-in service disconnect allows for service interchangeability at the motor head. Motor length will accommodate a minimum shade width of 28 inches.
